About the Security Center

The vision of the Security Center is to provide the VA Intranet user community with information pertaining to Federal and departmental security relating to Identity and Access Management (IAM). Particular emphasis is on Federal and departmental directives, policies and handbooks; other VA IAM related organizations; and specific information pertaining to VA application system Project Managers, Area Managers, and Systems Security Officers.

Spotlights

Knew Your Regulations

As technology, information systems, and the potential accompanying risk continue to evolve, so must the policy that guides our secure use of technology.

16th annual Information Security and Privacy Awareness Week (ISPAW) April 12-16.

The theme for ISPAW 2021 is "Better Together." This year during ISPAW, we'll highlight the role we all play in protecting VA and Veteran sensitive information and share best practices to help you successfully safeguard sensitive data.
