Subject: Comments on NIST White Paper Draft – Criteria for Labeling Program on Cyber Capabilities of IoT Devices

Greetings!

Here are a few comments on the subject draft:

Page 9 Data Protection, 1.a. Should this read "On this product component are protected when transmitted"

Page 9 Logical Access to Interfaces 1. Suggest a. and d. are moved from potential to current criteria for stronger security.

Page 9 Product Security 1. Suggest this criteria is moved from potential to current criteria for stronger security.

Regards,

Leah Zimmerman (VA-Enterprise Security Architecture)
