JOIN THE NICE PROMOTE CAREER DISCOVERY WORKING GROUP IN CELEBRATING CYBERSECURITY CAREER AWARENESS WEEK:

HOW TO NAVIGATE AN UNCONVENTIONAL CYBERSECURITY CAREER PATH

OCTOBER 19, 2022 / 3:30-4:30 PM ET

The NICE Promote Career Discovery Working Group will celebrate Cybersecurity Career Awareness Week with a special panel presentation on non-traditional pathways to enter a career in cybersecurity.

The cybersecurity workforce supply and demand challenges are something that we are all too familiar with at the moment. Talented, qualified, and experienced personnel have long outstripped supply, and the challenge will continue to grow if we only rely on traditional academic degree pathway options. Luckily, the straightforward linear path to cybersecurity employment is no longer the only option. There are now several routes to a satisfying cybersecurity career. Unconventional career paths can lead to job success with the right preparation.

Come learn about nontraditional approaches to preparing individuals to enter the cybersecurity workforce. This panel will share examples of unconventional career paths that they participated in or that they have created, the advantages of pursuing one, and how to navigate some of the associated challenges.

Connie Bragg, AT&T
Henry Danielson, Coast Unified School District
Keith Davis, Camden Dream Center
Ursula Jones, Goldbelt, Inc.
