Greetings,

Comments on Section 4.1. Add a new Govern Function

- I agree with the idea of having Gov as a function. I suggest to change the presentation of the CSF framework. I attached two proposals. The gov is the overarching function of all Cyber functions
- I suggest to add subcategory for Segregation of Duties and other subcategory for Conflict of interest for approval, accessing data etc under Gov
- I suggest adding category for Compliance/Assurance under Gov.
- I suggest adding Cybersecurity Performance Measures under Gov.
- I suggest to add Cybersecurity Architecture subcategory and/or Cybersecurity Engineering subcategory under Identify/Protect

For “Call for action”, I would like to collaborate with NIST in the following areas:

- “Call to Action – Share International Resources.”
  - Translate the CSF 2 to Arabic. I translated CSF ver 1.1 and I would like to translate ver 2.0
- “Call to Action – Provide Mappings.”
  - Explore the possibility of mapping Saudi National Cybersecurity Authority’s (NCA) Cybersecurity regulation to CSF 2.0
- Call to Action – Share Use of the CSF in Measuring and Assessing Cybersecurity:

Thanks,
Ali
