

Federal Laboratory Consortium

The Federal Laboratory Consortium for Technology Transfer (FLC) is the formally chartered, nationwide network of over 300 federal laboratories, agencies, and research centers, that fosters commercialization, best practice strategies, and opportunities, for accelerating federal technologies [out of the labs and into the marketplace](#).

Through American taxpayers' investment in our federal laboratories' research and development (R&D) efforts, scientific and technological breakthroughs can take place and return dividends to our economy. New industries, businesses, and jobs that can be created, when a new technology is brought to market, are just a few of the successes that take effect through [technology transfer](#) (T2), and the FLC is here to promote, facilitate, and [educate](#) labs and industry about that process.
