

Dan Neumann

Dan Neumann is currently the Group Leader for Neutron Condensed Matter Science at the NIST Center for Neutron Research. He joined NIST as an instrument scientist in 1987 after completing a PhD in materials physics at the University of Illinois at Urbana-Champaign. He has served on a number of national and international advisory and review panels at neutron and x-ray facilities and is a fellow of the Neutron Scattering Society of America and the American Physical Society. His research interests have centered on the use of neutron scattering to study the structure and dynamics of molecular materials and the design and development of instrumentation for neutron scattering.
