## STATEMENT OF WORK

### Compact High Temperature Sample Heating Stage for X-ray Scattering

#### I. BACKGROUND

The National Institute of Standards and Technology (NIST) Material Measurement Science Division (MMSD) provides the measurement science, measurement standards, and measurement technology required to enable world-leading characterization of materials in support of the nation's needs for the determination of the composition, structure, and properties of materials. The Division collaborates as a partner with staff at Argonne National Laboratory's Advanced Photon Source (APS), the brightest high-energy X-ray synchrotron facility in the Western hemisphere, in the development of a world-class ultra-small-angle X-ray scattering (USAXS) facility located at APS sector 9-ID, and its application in materials measurement science in support of the Division's and the NIST Material Measurement Laboratory (MML) missions. The USAXS facility includes advanced X-ray scattering and diffraction capabilities for microstructure characterization in a scale range from less than 1 nanometer to micrometers. However, it does not include any integral sample environment capability for temperatures above a few hundred degrees Celsius.

The capability to study samples at temperatures up to 1500 °C is now needed in support of the current initiative in "Additive Manufacturing" for which most samples will be metals and alloys that require high-temperature heat treatments. Shales, clays and other porous materials relevant to carbon dioxide mitigation will also be studied in high temperature environments as part of the Division's work in carbon mitigation and sustainable materials. This requirement is for a robust and reliable, compact and light-weight, high-temperature sample heating stage suitable for synchrotron X-ray scattering and diffraction measurements using a transmission geometry configuration with the sample mounted in a vertical orientation. The entrance and exit windows to the sample stage must be X-ray transparent and not add a significant scattering background. The exit window geometry must accommodate a sufficient solid angle for the exit beam to permit the small-angle X-ray scattering and wide-angle X-ray scattering and diffraction studies required. The stage must be capable of heating the sample to 1500 °C under an inert atmosphere (gas supplied separately), with an ability to hold this temperature for at least 24 hours. An option to heat the sample under vacuum conditions is preferred. The heating stage will be an integral part of the USAXS facility. This means that it must be interfaced with the USAXS instrument control system so that the latter can control the heating stage through a programed set of temperature ramp and dwell times, coordinated with a set of programed scattering and diffraction measurements.

#### II. SPECIFICATIONS

The Contractor shall provide a Linkam TS1500 Heating Stage or Equal meeting the following salient characteristics:

1. The heating stage system shall consist of a heater cell with removable window/door for sample mounting or replacement with the stage in place, liquid cooling circuit as needed, computer control interface, on-board control software, and associated cabling.
2. The heating stage shall be able to accommodate and hold thin samples 0.01 mm to 1.0 mm thick, and between 5 mm and 10 mm in diameter, with the sample (and stage) oriented in a vertical plane, and shall be compatible with transmission measurement geometry with respect to the horizontal incident and scattered or diffracted X-ray beams.
3. The horizontal incident X-ray beam must have an entrance path to the sample of at least 1.5 mm in diameter, while the scattered or diffracted X-ray beam from the sample must have an unobstructed exit path (apart from exit window) for scattered or diffracted exit directions within  $\pm 24$  degrees arc from the incident beam straight-on direction.
4. The heating stage shall have entrance and exit windows that, while protecting the heated sample environment from external conditions, shall permit the X-ray beam to enter and exit the cell with minimum attenuation or addition to the scattering or diffraction background. Quartz windows of thickness 1 mm or less have been shown to be suitable (more than 50 % transmission per window for X-ray energies of 20 keV or above). Both the entrance and exit windows shall be replaceable by the user. Spare windows with any necessary specialized tools for their replacement shall be supplied with the stage.
5. Due to restricted space within the X-ray instrument, the heating stage dimensions, including flanges and connectors, shall be less than 300 mm x 200 mm x 50 mm thick (along the incident X-ray beam direction) and the total mass of the stage, itself, shall not exceed 2 kg.
6. The heating stage must be capable of heating the sample from ambient to a pre-programmed temperature up to 1500 °C at a pre-programmed heating rate from a minimum of 1 °C per minute up to a maximum of at least 100 °C per minute. Equally, the heating cell must also be capable of cooling from a high temperature to a pre-programmed lower temperature down to ambient, also with a pre-programmed cooling rate from a minimum of 1 °C per minute up to a maximum of 100 °C per minute – subject to cooling limitations due to the thermal properties of the stage at lower temperatures (limitations must be specified). The temperature stability of the stage must be better than  $\pm 1$  °C for temperatures between 100 °C and 500 °C, and better than  $\pm 2$  °C above 500 °C. The overall accuracy in set-point temperature should be comparable to these values.
7. Thermocouple temperature readouts must be provided to determine that the sample environment in the immediate vicinity of the sample has attained the required set temperature, to monitor progress of the stage in executing heating and cooling temperature ramps, and to establish the thermal stability of the stage during a dwell time at any given temperature.

8. Through the computer control interface, using an existing external PC (not part of this solicitation), the heating stage must be capable of being programmed to execute a set of heating and cooling ramps, with controlled heating and cooling rates, to set higher and lower elevated temperatures, and holding each pre-programmed set temperature for pre-programmed dwell times ranging from one second to 24 hours. Thermocouple temperature readouts shall be provided to the PC at least twice per minute.
9. Through the computer control interface with the existing external PC that also controls the X-ray instrument, the heating stage programs must be capable of waiting for, and then accepting, a signal from the X-ray instrument to execute the next program step. Similarly, the heating stage control interface must be capable of sending a signal to the PC to indicate a heating cell program step is completed, so that the X-ray instrument can move through a set of X-ray scattering or diffraction measurements. This means that the electronics and computer control interface must be compatible with the Experimental Physics and Industrial Control System (EPICS) beam line control systems at the Advanced Photon Source, with a standard external trigger/gate 5 V TTL capability for the system also provided.
10. To protect against oxidation of samples such as alloys in air at high temperature, the heating stage, when closed with the sample in place, shall be sealed from the ambient environment. Using flexible tubing and quick-release gas connectors, or similar arrangement, it shall be possible to flush the sample environment with nitrogen or other inert gas continuously during operation.
11. To protect the heating stage hardware, and for safety, the external stage and sample door shall be liquid-cooled (e.g., with a flowing water/glycol mixture). The cooling circuit shall be sealed with the heating stage connected to a separate cooling unit via flexible tubing. Connections to the heating stage, itself, together with wires and tubes, shall be in the plane of the heating stage, and shall not extend in the heating stage thickness direction.
12. Operations and Maintenance Manual giving full description of operating and maintenance procedures shall be provided to the NIST TPOC upon delivery of the system.

As part of this system, the contractor shall provide an operations and Maintenance Manual giving full description of operating and maintenance procedures. A hard copy of the manual, drawings and any test results shall be included with the equipment and delivered to the Argonne National Laboratory as stated below in the delivery section.

### **III.WARRANTY**

The heating stage system shall be covered by an unlimited one (1) year warranty, including parts, labor, and travel and begin upon acceptance of the equipment by the Government. If during this time the heating stage or any components do not meet the requirements set forth in this statement of work, the contractor shall repair at no cost to the government. The

contractor will provide phone or email support during normal business hours of 8:00 am to 5:00 pm Eastern for any set-up or operation problems encountered during the warranty period.

The contractor is responsible for traveling to the Argonne National Laboratory to fix any deficiencies discovered during acceptance testing at no additional cost to the Government. Final acceptance will not occur until the equipment performs to the required specifications.

Payment will be made in one lump sum upon successful completion of the requirements identified in this REQUIREMENTS DOCUMENT.

. 6 52.204-13 SYSTEM FOR AWARD MANAGEMENT MAINTENANCE (JULY 2013)

(a) Definitions. As used in this clause--

Data Universal Numbering System (DUNS) number means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities, which is used as the identification number for Federal Contractors.

Data Universal Numbering System+4 (DUNS+4) number means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional SAM records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at subpart 32.11) for the same concern. Registered in the System for Award Management (SAM) database means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, the Contractor and Government Entity (CAGE) code, as well as data required by the Federal Funding Accountability and Transparency Act of 2006 (see subpart 4.14), into the SAM database;

(2) The Contractor has completed the Core, Assertions, Representations and Certifications, and Points of Contact sections of the registration in the SAM database;

(3) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS). The Contractor will be required to provide consent for TIN validation to the Government as a part of the SAM registration process; and

(4) The Government has marked the record ``Active''.

System for Award Management (SAM) means the primary Government repository for prospective Federal awardee and Federal awardee information and the centralized Government system for certain contracting, grants, and other assistance-related processes. It includes--

(1) Data collected from prospective Federal awardees required for the conduct of business with the Government;

(2) Prospective contractor-submitted annual representations and certifications in accordance with FAR subpart 4.12; and

(3) Identification of those parties excluded from receiving Federal contracts, certain subcontracts, and certain types of Federal financial and non-financial assistance and benefits.

(b) The Contractor is responsible for the accuracy and completeness of the data within the SAM database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the SAM database after the initial registration, the Contractor is required to review and update on an annual basis, from the date of initial registration or subsequent updates, its information in the SAM database to ensure it is current, accurate and complete. Updating information in the SAM does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(c)(1)(i) If a Contractor has legally changed its business name, doing business as name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one business day's written notification of its intention to--

(A) Change the name in the SAM database;

(B) Comply with the requirements of subpart 42.12 of the FAR; and

(C) Agree in writing to the timeline and procedures specified by the responsible Contracting Officer. The Contractor shall provide with the notification sufficient documentation to support the legally changed name.

(ii) If the Contractor fails to comply with the requirements of paragraph (c)(1)(i) of this clause, or fails to perform the agreement at paragraph (c)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the SAM information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the ``Suspension of Payment'' paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the SAM record to reflect an assignee for the purpose of assignment of claims (see FAR subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the SAM. Information provided to the Contractor's SAM record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the ``Suspension of Payment'' paragraph of the EFT clause of this contract.

(3) The Contractor shall ensure that the DUNS number is maintained with Dun & Bradstreet throughout the life of the contract. The Contractor shall communicate any change to the DUNS number to the Contracting Officer within 30 days after the change, so an appropriate modification can be issued to update the data on the contract. A change in the DUNS number does not necessarily require a novation be accomplished. Dun & Bradstreet may be contacted--

(i) Via the internet at <http://fedgov.dnb.com/webform> or if the Contractor does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office.

(d) Contractors may obtain additional information on registration and annual confirmation requirements at <https://www.acquisition.gov>.

(End of clause)

Commercial and Government Entity (CAGE) code means--

(1) An identifier assigned to entities located in the United States or its outlying areas by the Defense Logistics Agency (DLA) Contractor and Government Entity (CAGE) Branch to identify a commercial or Government entity; or

(2) An identifier assigned by a member of the North Atlantic Treaty Organization (NATO) or by the NATO Support Agency (NSPA) to entities located outside the United States and its outlying areas that the DLA Contractor and Government Entity (CAGE) Branch records and maintains in the CAGE master file. This type of code is known as an NCAGE code.

(b) The Offeror shall enter its CAGE code in its offer with its name and address or otherwise include it prominently in its proposal. The CAGE code entered must be for that name and address. Enter CAGE before the number. The CAGE code is required prior to award.

(c) CAGE codes may be obtained via--

(1) Registration in the System for Award Management (SAM) at [www.sam.gov](http://www.sam.gov). If the Offeror is located in the United States or its outlying areas and does not already have a CAGE code assigned, the DLA Contractor and Government Entity (CAGE) Branch will assign a CAGE code as a part of the SAM registration process. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest;

accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals--

(1) [ ] Are, [ ] are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) [ ] Have, [ ] have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property; and

(3) [ ] Are, [ ] are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) [ ] Have, [ ] have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is

delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. #####6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. #####6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals Contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. #####6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. #####362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). . 23 1352.209-74 ORGANIZATIONAL CONFLICT OF INTEREST (APR 2010)

(a) Purpose. The purpose of this clause is to ensure that the contractor and its subcontractors:

(1) Are not biased because of their financial, contractual, organizational, or other interests which relate to the work under this contract, and

(2) Do not obtain any unfair competitive advantage over other parties by virtue of their performance of this contract.

(b) Scope. The restrictions described herein shall apply to performance or participation by the contractor, its parents, affiliates, divisions and subsidiaries, and successors in interest (hereinafter collectively referred to as "contractor") in the activities covered by this clause as a prime contractor, subcontractor, co-sponsor, joint venturer, consultant, or in any similar capacity.

For the purpose of this clause, affiliation occurs when a business concern is controlled by or has the power to control another or when a third party has the power to control both.

(c) Warrant and Disclosure. The warrant and disclosure requirements of this paragraph apply with full force to both the contractor and all subcontractors. The contractor warrants that, to the best of the contractor's knowledge and belief, there are no relevant facts or circumstances which would give rise to an organizational conflict of interest, as defined in FAR Subpart 9.5, and that the contractor has disclosed all relevant information regarding any actual or potential conflict. The contractor agrees it shall make an immediate and full disclosure, in writing, to the Contracting Officer of any potential or actual organizational conflict of interest or the existence of any facts that may cause a reasonably prudent person to question the contractor's impartiality because of the appearance or existence of bias or an unfair competitive advantage. Such disclosure shall include a description of the actions the contractor has taken or proposes to take in order to avoid, neutralize, or mitigate any resulting conflict of interest.

(d) Remedies. The Contracting Officer may terminate this contract for convenience, in whole or in part, if the Contracting Officer deems such termination necessary to avoid, neutralize or mitigate an actual or apparent organizational conflict of interest. If the contractor fails to disclose facts pertaining to the existence of a potential or actual organizational conflict of interest or misrepresents relevant information to the Contracting Officer, the Government may terminate the contract for default, suspend or debar the contractor from Government contracting, or pursue such other remedies as may be permitted by law or this contract.

(e) Subcontracts. The contractor shall include a clause substantially similar to this clause, including paragraphs (f) and (g), in any subcontract or consultant agreement at any tier expected to exceed the simplified acquisition threshold. The terms "contract," "contractor," and "Contracting Officer" shall be appropriately modified to preserve the Government's rights.

(f) Prime Contractor Responsibilities. The contractor shall obtain from its subcontractors or consultants the disclosure required in FAR Part 9.507-1, and shall determine in writing whether the interests disclosed present an actual, or significant potential for, an organizational conflict of interest. The contractor shall identify and avoid, neutralize, or mitigate any subcontractor organizational conflict prior to award of the contract to the satisfaction of the Contracting Officer. If the subcontractor's organizational conflict cannot be avoided, neutralized, or mitigated, the contractor must obtain the written approval of the Contracting Officer prior to entering into the subcontract. If the contractor becomes aware of a subcontractor's potential or actual organizational conflict of interest after contract award, the contractor agrees that the Contractor may be required to eliminate the subcontractor from its team, at the contractor's own risk.

(g) Waiver. The parties recognize that this clause has potential effects which will survive the performance of this contract and that it is impossible to foresee each circumstance to which it might be applied in the future. Accordingly, the contractor may at any time seek a waiver from the Head of the Contracting Activity by submitting such waiver request to the Contracting Officer, including a full written description of the requested waiver and the reasons in support thereof.
